

Ceramic Fiber Cloth

Metal Erosion Ability

Non-Toxic, Harmless, And Odorless

Electrical Insulation Properties

Acid and Alkali Corrosion Resistance

Application:

Ceramic fiber cloth is a woven fabric made of ceramic fiber yarn. The main raw materials include alumina, silicate or borate, etc. It has excellent heat resistance and chemical stability.

Technical Data:

Item	Ceramic Fiber Cloth		Ceramic Fiber Tape	
	Glass Fiber	Stainless Steel	Glass Fiber	Stainless Steel
Physical Property	Glass Fiber	Stainless Steel	Glass Fiber	Stainless Steel
Bulk Density, kg/m ³	500-650		500-650	
Size, mm	30000 x 1000 x 2/3		30000 x 50/75 x 2/3	
Moisture Content, %	≤2		≤2	
Continuous Temperature Use Limit, °C	650	1050	600	1050
Organic Content, %	≤15		≤15
